OBJECTIVE: To obtain an entry-level Python position where I can use my self-taught education, penchant for learning, and passion for programming to help a company exceed. I strive for high quality and elegant solutions over complex designs. I am also eager to grow and learn under structured leadership and to demonstrate my abilities and potential.

SKILLS

Languages: Python, JavaScript

Web Design: HTML, CSS

Other: Command line, Microsoft Office Suite

Version Control: Git

Databases: SQL

IDE: Sublime Text

PROJECTS (Available for view on github link)

Web Scraper

- ❖ Scrapes the The Weather Channel (<https://weather.com/>) for the 10 day forecast and returns a CVS file that can be opened in any spreadsheet application.

Body Mass Index (BMI) Calculator

- ❖ A script that requires user input to determine the user's body mass index.

Dog Name Generator

- ❖ A script that randomly returns 10 dog names from a list of names.
